

Collection name: Banners

Sn No	Field Name	Data Type	Description
1	docId	Document	Unique id to identify the document
2	banner_id	Integer	Unique identifier for the banner
3	image_url	String	URL of the banner image

Collection name: Buyers

Sn No	Field Name	Data Type	Description
1	docId	Document	Unique id to identify the document
2	buyer_id	String	Unique identifier for the buyer
3	address	String	Address of the buyer
4	email	String	Email address of the buyer
5	full_name	String	Full name of the buyer
6	phone_number	String	Phone number of the buyer
7	profile_image	String	URL of the buyer's profile image

Collection name: Categories

Sn No	Field Name	Data Type	Description
1	docId	Document	Unique id to identify the document
2	category_id	String	Unique identifier for the category
3	category_name	String	Name of the category
4	image	String	URL of the category image

Collection name: Orders

Sn No	Field Name	Data Type	Description
1	docId	Document	Unique id to identify the document
2	accepted	Boolean	Indicates whether the order is accepted
3	address	String	Address for the order delivery
4	buyer_id	String	Unique identifier for the buyer
5	buyer_photo	String	URL of the buyer's profile photo
6	email	String	Email address of the buyer
7	full_name	String	Full name of the buyer
8	order_date	Timestamp	Date and time when the order was placed
9	order_id	String	Unique identifier for the order
10	phone	String	Phone number of the buyer
11	product_id	String	Unique identifier for the product
12	product_images	Array	Array of URLs of product images
13	product_name	String	Name of the ordered product
14	product_price	Number	Price of the ordered product
15	quantity	Number	Quantity of the ordered product
16	schedule_date	Timestamp	Date and time scheduled for delivery
17	selected_quantity	Number	Quantity selected by the buyer
18	vendor_id	String	Unique identifier for the vendor

Collection name: Products

Sn No	Field Name	Data Type	Description
1	docId	Document	Unique id to identify the document
2	approved	Boolean	Indicates whether the product is approved for sale
3	bloom_time	String	Time of year when the plant blooms
4	brand_name	String	Brand name or seller name
5	category	String	Category of the product
6	charge_shipping	Null	Charge for shipping (null for not applicable)
7	common_name	String	Common name of the plant
8	description	String	Description of the plant
9	diff_level	String	Difficulty level of care for the plant
10	discount	Null	Discount on the product (null for not applicable)
11	discount_price	Null	Discounted price of the product (null for not applicable)
12	flower_color	String	Color of the flowers
13	image_url_list	Array	Array of URLs of product images
14	is_care_tip	Boolean	Indicates if care tips are available
15	is_plant_specification	Boolean	Indicates if plant specifications are available
16	max_height	String	Maximum height of the plant
17	plant_care_tips	String	Care tips for the plant
18	plant_height	String	Height of the plant
19	plant_spread	String	Spread of the plant
20	product_id	String	Unique identifier for the product
21	product_name	String	Name of the product
22	product_price	Number	Price of the product
23	quantity	Number	Quantity of the product available
24	schedule_date	Timestamp	Date and time scheduled for availability
25	scientific_name	String	Scientific name of the plant
26	shipping_charge	Null	Shipping charge for the product (null for not applicable)
27	size_list	Null	List of available sizes (null for not applicable)
28	special_features	String	Special features of the plant
29	uses	String	Uses of the plant
30	vendor_id	String	Unique identifier for the vendor

Collection name: Wishlist

Sn No	Field Name	Data Type	Description
1	docId	Document	Document identifier for Firestore
2	image	String	URL of the product image in the wishlist
3	buyer_id	String	Unique identifier for the buyer
4	product_id	String	Unique identifier for the product
5	product_name	String	Name of the product in the wishlist
6	product_price	Number	Price of the product in the wishlist

Collection name: Vendors

Sn No	Field Name	Data Type	Description
1	docId	Document	Unique id to identify the document
2	approved	Boolean	Indicates whether the vendor is approved
3	business_name	String	Name of the vendor's business
4	city_value	String	City where the vendor's business is located
5	country_value	String	Country where the vendor's business is located
6	email	String	Email address of the vendor
7	phone_number	String	Phone number of the vendor
8	state_value	String	State where the vendor's business is located
9	store_image	String	URL of the vendor's store image
10	tax_number	String	Tax identification number of the vendor
11	vendor_id	String	Unique identifier for the vendor

Collection name: Payment

Sn No	Field Name	Data Type	Description
1	docId	Document	Document identifier for Firestore
2	order_id	String	Unique identifier for the order
3	payment_id	String	Unique identifier for the payment
4	amount	Number	Amount of the payment
5	currency	String	Currency of the payment
6	payment_date	Timestamp	Date and time when the payment was made
7	status	String	Status of the payment (e.g., pending, completed, failed)
8	buyer_id	String	Unique identifier for the buyer
9	vendor_id	String	Unique identifier for the vendor
